

Jainam Shah

Senior Frontend Engineer | React.js | Next.js | Scalable Frontend Architecture

Ahmedabad, India | +91 94090 56174 | jainamshah7111997@gmail.com | linkedin.com/in/jainam-shah-1a88a8187 | github.com/jainam7 | jainam-shah-portfolio.vercel.app

PROFESSIONAL SUMMARY

Frontend Engineer with **5+ years of experience** architecting high-performance React.js and Next.js applications across SaaS, workflow automation, and B2C platforms. Proven track record of reducing load times by 60%+, leading end-to-end frontend architecture for multi-module enterprise products, and delivering scalable component systems used across teams. Adept at GraphQL, state management, BPMN-based workflow tooling, and performance-first UI engineering.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Architecture:	Frontend Architecture, Reusable Component Systems, Performance Optimization, Lazy Loading, Memoization, Code Splitting
State & APIs:	Redux, GraphQL, REST APIs
Tools & Platforms:	BPMN.js, Camunda, GitHub, Vercel, CI/CD Pipelines
AI Tools:	ChatGPT, Claude AI (code generation, debugging, documentation)

PROFESSIONAL EXPERIENCE

Software Engineer – Frontend

Sep 2024 – Present

Bankai Infotech — Ahmedabad, India

- Architected a **workflow-driven API builder platform** using Next.js and BPMN.js, reducing workflow configuration time by ~40% through reusable visual components and modular execution modules.
- Built and shipped 6+ enterprise modules — onboarding, RBAC, workflow execution, and vendor integrations — supporting 50+ client organizations on a multi-tenant SaaS platform.
- Optimized large workflow editor rendering by refactoring state management and eliminating unnecessary re-renders, **cutting average load time from ~4s to under 1.5s**.
- Engineered a **dynamic, nested expression builder** with suggestion-driven UX and live API integrations, reducing manual configuration errors by an estimated 35%.

Frontend Engineer

Dec 2021 – Sep 2024

Beehively — Ahmedabad, India

- Revamped **attendance tracking and analytics dashboards** using React.js, GraphQL, and Next.js, serving 500+ schools and reducing data load latency by 45%.
- Led frontend development of a **real-time urgent alert system** used by 10,000+ students and staff, improving emergency communication response time by 30%.
- Designed and implemented a **scalable UI component library**, reducing feature development time by 25% and ensuring consistency across 3 product lines.
- Optimized state management architecture across large-scale React applications, reducing client-reported UI bugs by 40% over two release cycles.

Frontend Engineer

Jan 2020 – Dec 2021

Treebo Hotels — Bengaluru, India

- Developed and optimized **customer-facing booking flows** for a platform serving 1M+ monthly users, improving page load speed by 35% through code splitting and lazy loading.
- Built responsive hotel management dashboards and enhanced **guest search UX**, contributing to a 15% increase in booking conversion rate.

FEATURED PROJECT

Workflow Automation Builder Platform | Next.js, BPMN.js, React.js, TypeScript

- Built a production-grade visual workflow automation platform supporting complex multi-step API orchestration, nested execution logic, and real-time rendering of large workflow graphs (100+ nodes) with no perceptible lag.
- Implemented modular execution modules with reusable BPMN components, cutting new workflow template creation time by 50% for enterprise clients.

EDUCATION

MSc Information Technology — DAIICT, Gandhinagar

2018 – 2020

BSc Computer Applications & IT — K S School of Business Management, Ahmedabad

2015 – 2018
